

O'NEIL Obidiaso

Frontend Developer | Next.js & React

Oldbury, UK | +447350154783 | oneilville@gmail.com | <https://oneil-obidiaso.vercel.app/> | <https://www.linkedin.com/in/o-neil-obidiaso-1172b5293>

Profile

Frontend-focused full-stack developer with hands-on experience building and deploying responsive web applications using React, Next.js, TypeScript, and Tailwind CSS. Experienced with backend development using Supabase (Postgres, authentication, and REST APIs). Comfortable taking features from concept to production and collaborating across the full stack. Regular user of AI-assisted development tools, including Claude Code, GitHub Copilot and Antigravity IDE, to accelerate development while maintaining code quality.

Skills

Frontend:

- React
- Next.js (App Router)
- TypeScript
- Tailwind CSS
- HTML5
- CSS3

Backend & Database:

- Supabase (PostgreSQL, Auth, REST APIs)
- Next.js API Routes and Server Actions
- Neon
- Firebase

Tools & APIs:

- Git & GitHub
- Postman
- REST APIs
- Claude Code
- Antigravity IDE
- Github Copilot
- Figma

Other:

- Responsive Design
- UI/UX Fundamentals
- Problem Solving

Education

BSc Information Technology & Business Information Systems

Middlesex University, London | June 2026

Key modules: Business Intelligence (Tableau), Strategic Information Systems and Management, IT Solutions and Deployment, Technology and Innovation Management and Entrepreneurship

Advanced Diploma in Software Engineering

Aptech Lagos, Nigeria | January 2024

Key modules: Software Development Fundamentals, Object-Oriented Programming, Web Development (HTML, CSS, JavaScript), Database Basics

Work Experience

Tutor – Frontend Development & Web Development

Cybite Academy, Freelance | 2023–2025

- Taught React, HTML/CSS, responsive design, and UI/UX fundamentals to students in a structured learning environment
- Built practical demo projects (to-do apps, weather apps, layout challenges, etc.) to simplify complex concepts
- Supported learners in debugging and improving their frontend projects

Freelance Developer

Various Projects | 2023–2024

- Built small to medium websites for local clients using React and Firebase
- Handled everything from design mockups to deployment

Personal Projects

Slip Builder – Football Bet Slip Generator

Next.js, Supabase, Paystack, API-Football

- Built a full-stack web app with authentication, payments, and sports data integration
- Implemented free and premium tiers with a credit-based access system
- Integrated external sports API for real-time match data and slip generation

Outsy – Structured Decision-Making App

Next.js, Supabase, TypeScript

- Developed a decision-making tool that helps users break down and compare choices systematically
- Implemented user authentication and persistent data storage using Supabase
- Designed core logic for structured option evaluation and tracking

Event Planner App – Learning Project

Next.js, Supabase

- Built a full-stack event planning app to deepen understanding of authentication, database design, and Next JS server actions.
- Focused on end-to-end implementation across frontend, backend, and data layers
- Strengthened practical knowledge of Next.js App Router architecture

Other

- Eligible for the UK Graduate Route visa (2-year post-study work authorization)

- Actively focused on building scalable web applications and product-driven solutions
- Interests include technology ecosystems, esports platforms, and user-centered product development
